How many energy storage sites are there in Spain?
Data Protection Policy The Spanish energy agency has proposed funding for 144 energy storage sitestotaling 2.61 GW and 11.14 GWh under a European Regional Development Fund program.

How will Spain increase its energy storage capacity?
Spain has launched an ambitious EUR700 million (around $796 million) programto increase its energy storage capacity. This plan will add 2.5 to 3.5 gigawatts (GW) of storage. It includes pumped hydro,thermal energy storage,and battery systems.

Does Spain need energy storage?
Additionally, Spain is strengthening policies to support the growth of energy storage. The country aims to deploy 22 GW of energy storage by 2030 and 50 GW by 2050. Currently, the total installed capacity of energy storage in Spain--covering planned, under-construction, and completed projects--stands at about 20 GW.

How much did ESS invest?
Developers have pledged EUR1.99 billionin total investment for 144 projects representing 2.61 GW and 11.14 GWh of capacity. Battery energy storage systems accounted for 124 of the selected projects,while 17 involved thermal or power-to-heat storage and three were pumped hydro sites.
