Guinea's Kaleta Hydropower Station, built by a Chinese company, started full operations 10 years ago. The facility, supplying stable electricity to the national capital and villages in the northern ...

This page lists the main power stations in Guinea contributing to the public power supply. There are also a number of private power plants supplying specific industrial users such as mines and refineries. Guinea is considered to have considerable renewable energy potential. Schemes at an advanced state of development are included.

(Yicai) Jan. 9 -- Chinese hydropower equipment supplier Zhefu Holdings has won a CNY223 million (USD31 million) order from a hydropower station under construction in Guinea.

On June 9, 1966, the station was completed. With an effective reservoir capacity of 2.74 million cubic meters and an installed capacity of 4&#215;800 kilowatt unit sets, it supplied ...
