-----  
What is an uninterruptible power supply (UPS battery backup)?

An Uninterruptible Power Supply (aka a UPS Battery Backup) protects vital connected equipment -- computers, servers, and telecommunications equipment -- from power outages. During an outage, that small UPS Battery Backup under your desk at work gives you enough time to save your spreadsheet and properly shut down your computer.

What is an uninterruptible power system (UPS)?

Uninterruptible power system (UPS) (1) An electrical system designed to provide instant, transient- free backup power during power failure or fault. Some UPSs also filter and/or regulate utility power (line conditioning). (2) A Device whose sole purpose is to save your equipment, your data and your job. User replaceable

Is a ups a primary surge protection device?

A UPS delivers second-level protection against surges; it should never be considered a primary surge protection device. It also continually regulates incoming voltage and provides an internal battery that allows connected equipment to continue running even if the power supply is cut.

Do you need an ups?

Recommendations for improved reliability In traditional power designs, you may have one UPS supporting your servers, switches and storage devices. In this type of environment, you are prone to having to shut down your equipment during a power failure, UPS maintenance or UPS replacement.

Sep 30, 2020&ensp;&#0183;&ensp;An Uninterruptible Power Supply (UPS) is a device designed to provide backup power when the primary power source fails or when ...

Uninterruptible Power Supply UPS stands for uninterruptible power supply, with AEG technology safe,
