What is a 25kW solar power system?

25kW solar power systems are mostly suitable for SMEs with medium energy needs. This size of solar power system is classed as 'Commercial'. A 25kW solar system will certainly cost a different amount depending on the solar business you buy it from. Prices also vary from city to city due to logistics,taxes etc.

How many units can a 25kW solar system generate?

The average generation capacity of a 25kW solar system is 100 units/day. 3,000 units x 12 months = 36,000 units/year. There is a 5 years warranty for the complete system and 25 years for the solar panel. Solar Net Metering applies only to hybrid and on-grid solar system.

What is a 25kW hybrid solar system?

A 25kW hybrid solar system combines the features of on-grid (with net-metering) and off-grid (with battery) solar systems. This solar system was named the hybrid solar system because of its crossover properties. It includes net-metering as well as solar batteries,and can be operated with or without a government grid.

How much does a 25kW Solar System cost?

The cost of 25kW solar power systems varies. On the lower end,you might expect to get Chinese inverters such as Sungrow,Growatt,JFY,Goodwe etc. and Chinese (lower-tier) panels such as Hannover,Munsterland,ZN Shine etc. You might expect to pay \$28,800.00for such a system.
