Is Vietnam launching a green port pilot project in 2021?

In July 2021, Vietnam Maritime Administration (VMA) announced that Vietnam would execute a green port pilot project in certain seaports from 2023 before expanding the model to other ports. To realize this plan, Vietnam will allocate significant investments to create world-class ports in the next phase of its seaport master plan.

When will Green ports be introduced in Vietnam?

According to this project, Vietnam will strive to apply compulsory national standards of green ports to port development beginning in 2030. In July 2021, Vietnam Maritime Administration (VMA) announced that Vietnam would execute a green port pilot project in certain seaports from 2023 before expanding the model to other ports.

How GM Vietnam supports green port development?

GM Vietnam has supported the program by having trade missions and seminars to raise awareness and promote stakeholder cooperation on green port development in Vietnam. - Resources planning and usage: optimizing water consumption, land use, and material management.

Does Vietnam have a climate-smart infrastructure?

Climate-smart infrastructure: reducing greenhouse gas emissions from port operations and transport modes, enhancing resilience and adaptation to climate change impacts. Vietnam aims to improve ports' energy efficiency, use renewable energy sources, and apply national standards for its green port development plan by 2030.
