What is a 2KW solar panel system?

A 2kW solar panel system is a renewable energy solution that consists of solar panels, an inverter, batteries (for off-grid setups), and other accessories to generate and store electricity from sunlight. This system is ideal for small homes, offices, and shops that require a moderate amount of power.

How much does a 2KW Solar System cost?

The typical cost for a 2kW solar system is around \$4,000. It is important to highlight that solar panel prices have significantly decreased over the past 10 years, making renewable energy more accessible and affordable for homeowners and businesses. Source: The National Renewable Energy Laboratory (NREL)

Why should you choose a 2KW solar panel system in India?

With the rising cost of electricity and increasing environmental concerns, solar energy has become the preferred choice for homeowners and businesses in India. A 2kW solar panel system is one of the most popular and affordable options for households, offering a balance between power generation and cost-effectiveness.

How many panels does a 2KW Solar System need?

Considering that each panel has a size of 17 sqft, and you will need 7 panels for a 2kW system, the total footprint will be 113 sqft. How Many kWh Does a 2kW Solar System Produce?
