How to install a 50 kW solar system in India?

To install a 50kW solar system, you need shade-free space of 258.4 m² - 328.1 m². For rooftop solar plants installed for residential use all over India, the following Central Financial Assistance (CFA)/Central Government Subsidy are available. Note: *The subsidy amount is fixed for rooftop solar systems of 3 kW and above capacity.

Are 50 kW solar panels a good option?

The 50kW solar panels are the primary source of energy and meet a majority of your energy needs. Solar batteries keep your home powered during night hours and power outages. If you still need additional power beyond what your solar panels and batteries provide, you have the flexibility to draw grid electricity.

Can a 50kW Solar System take you off the grid?

A 50kW solar system can literally take you off the grid. Every unit of free solar electricity used translates to savings as you take less and less of the grid power. The financial advantages of solar energy eventually help you recover your upfront 50kW solar system cost in just 6-8 years.

How do I determine the installation cost for my 50kW solar plant?

The best way to determine the installation cost for your 50kW solar plant is to seek quotes from multiple vendors. Alternatively, you can hire a one-stop solar energy company that has the expertise to handle your solar project from design to installation.

This achieves an integrated "PV + Energy Storage" solution. The cabinet system adopts a modular design, allowing flexible configurations for photovoltaic, batteries, and loads, meeting ...

Large housing societies and commercial spaces can cut their power costs with a 50kW solar system. Find out how a 50kW capacity is right for you. Call Amplus Solar to receive a quote.
