What are the best portable chargers & power banks in 2025?

November 18, 2025: With this update, our lineup of recommended portable chargers and power banks remains unchanged. The existing picks have been vetted for currency and availability. The Anker Laptop Power Bank has a capacity of 25,000mAh, but more importantly, it can deliver 100W of power from a single port.

How much does a power bank cost?

Iniu Power Bank BaI-B64 for \$80: Offering relatively low prices, Iniu is a power bank brand on the rise. This portable charger packs a 27,000-mAh capacity, can put out up to 140 watts, and charges three devices at once via two USB-C ports and a single USB-A port.

Which power bank should I buy?

If you're looking for a compact power bank with decent capacity, Anker's Nano Power Bank is my pick, but watch out because the company has several power banks with the same name. This model has a 10,000 mAh capacity, a 2.3-foot retractable cable, and the ability to charge devices at up to 45 watts.

How much power does a power bank give a phone?

Our testing shows that a power bank can offer your phone between 70-80% of the power it contains, or more depending on the battery. It loses the rest due to the inefficiency of the power transfer. That means a 5,000 mAh battery can fully charge a phone with a 3,500 mAh battery, like an iPhone 16.
