What is the voltage in Algeria?

Just like in most parts of the world, the voltage in Algeria is 230 volts and the frequency is 50 Hz. Algeria is one of the very few former French colonies that did not adopt the type E standard that is used by France. Instead, it has standardized on type F sockets and plugs.

What type of plugs can be used in Algeria?

Instead, it has standardized on type F sockets and plugs. Type C and type E plugs can also be used thanks to their compatibility with type F sockets. Typically, type C plug sockets are not allowed to be installed in Algeria: these outlets are not earthed and are therefore considered dangerous.

Are type C plug sockets allowed in Algeria?

Typically, type C plug sockets are not allowed to be installed in Algeria: these outlets are not earthed and are therefore considered dangerous. Only type F power points are permitted because they are grounded and therefore significantly safer. The only (and rare) exception to this rule is that an old type C outlet should be replaced by a new one.

What type of sockets does Algeria use?

Algeria is one of the very few former French colonies that did not adopt the type E standard that is used by France. Instead, it has standardized on type F sockets and plugs. Type C and type E plugs can also be used thanks to their compatibility with type F sockets.
