What is alternative power solutions in the East African region?

Our aspiration is to provide alternative power solutions in the East African Region. We provide unique specialized services tailored to meet the requirements of the region in terms of Solar, Wind Powered Equipment, Uninterruptible Power Supply (UPS) as well as Power Backup Systems.

What is a DC-UPS power supply?

DC-UPS (Direct Current Uninterruptible Power Supplies) are essential wherever reliable backup of auxiliary circuits is critical to ensure system integrity and the safety of people and equipment.

How does an uninterruptible power supply work?

The uninterruptible power supplies have e.g. an adjustable maximum buffer time to protect the battery and the unit protects the battery from going into a deep discharge. Draining the battery all the way down can damage it in a very short period of time, especially if this occurs multiple times.

What are UPS modules with capacitor storage?

UPS modules with capacitor storage are equipped with integrated electrochemical double layer capacitors. In case of a power fault they guarantee an uninterrupted power supply for several seconds. By using such UPS modules, processes can be completed and data saved, for instance.
