Will a solar power plant accelerate Bahrain's energy transition via Saudi Arabia?

The 2.8 GW solar plant accelerates Bahrain's energy transition via Saudi Arabia. ACWA Power and Bapco Energies have inked an agreement for the development of a solar power plant with large-scale battery energy storage system in the Eastern Province of the Kingdom of Saudi Arabia.

Where is a solar power plant located in Bahrain?

The solar power plant will be located in the southern region of Bahrain, near Bilaj Al Jazayer, covering a total area of approximately 1.2 square km. The project will utilise the latest advancements in solar energy technologies to optimise output and efficiency.

Is Bahrain transitioning to solar energy projects?

After the establishment of the Sustainable Energy Unit (SEU) in Bahrain in 2014, a radical transition toward launching solar energy projects can clearly be observed. The SEU was established in collaboration between the national government and the United Nations Development Program (UNDP).

What does BAPCO energy do for Bahrain?

The project forms part of Bapco Energies' commitment to the Bahrain National Energy Strategy, focusing on improving energy demand efficiency, diversifying the national energy mix, including renewables and ensuring secure and competitive access to energy. The 2.8 GW solar plant accelerates Bahrain's energy transition via Saudi Arabia.
