What is a battery energy storage system (BESS)?

A battery energy storage system (BESS) is a type of energy infrastructure that plays a critical role to support the function of the California electrical grid.

How many MW of battery storage will California need by 2045?

The state projects 52,000 MW of battery storage will be needed by 2045. The California Energy Commission manages the California Energy Storage Survey, a dashboard showing statewide data for residential, commercial and utility-scale BESS facilities. What is a battery energy storage system (BESS)?

What is a battery energy storage system?

A battery energy storage system (BESS) is a type of energy infrastructure that plays a critical role to support the function of the California electrical grid. Many large-scale BESS projects are connected to the grid through utilities and can either be paired with an energy generation source, such as solar or wind, or be standalone facilities.

What is the Morro Bay Battery energy storage system?

The Morro Bay Battery Energy Storage System (BESS) is a proposed 600 MW / 2,400 MWh facility on 43 acres of the former Morro Bay Power Plant site in California. Developed by Texas-based Vistra Energy, the project aims to repurpose an inactive coastal power station into one of the largest standalone battery storage projects in the state.
