-----  
Is ENGIE generating a Bess project in Belgium?

ENGIE is also generating two other BESS projects in Belgium which already have credentials in place, a 100-MW/400-MWh scheme in Kallo and an 80-MW/320-MWh battery in Drogenbos. The firm targets 10 GW of battery capability globally by 2030. At the end of 2023, it contained 1.3 GW of battery capacity in function and 3.6 GW secured under development.

Where is the battery energy storage project located in Belgium?

Once completed, the four-hour battery energy storage project will operate under a 15-year contract with Elia, Belgium's electricity grid operator, and be located next to Engie's gas power plant in Vilvoorde. From pv magazine ESS News site

What does Bess stand for?

French electric utility ENGIE SA has undertaken construction of a 200-MW/800-MWh battery energy storage system (BESS) at its Vilvoorde site on the outskirts of Brussels in Belgium.

Will Engie be able to build a new battery plant in Belgium?

Engie described this as "a double success within the CRM framework," which ensures a future for its site in Belgium. The Vilvoorde BESS project will be launched in two phases, with the commissioning of 100 MW of batteries in September 2025, and a further 100 MW in January 2026.

In a significant stride toward a cleaner and more flexible energy future, global energy leader ENGIE, in collaboration with NHOA Energy, celebrated the groundbreaking of a major battery ...

Installed on the site of a former coal-fired power station, it will be able to supply 25 megawatts for 4 hours and will be one of the first battery parks in Europe to have such a capacity.
