Can Black Mountain Energy Storage build a battery energy storage facility?

Black Mountain Energy Storage is currently seeking to lease or purchase land to build battery energy storage facilities. A property needs to be at least 5-10 acres and located near or adjacent to existing electric transmission infrastructure in order to comfortably accommodate a battery energy storage facility.

Who is Black Mountain Energy Storage?

Leveraging cumulative decades of electric market experience, Black Mountain Energy Storage develops powerful, flexible, and strategically placed battery energy storage projects to foster a resilient electric grid. BMES' quickly expanding team of energy experts are fast actors in pipeline development of utility-scale energy storage solutions.

Should you use solar battery storage in a power outage?

Although solar battery storage will keep important appliances and devices running in an outage, the manufacturers and some installers I spoke with all said they consider that to be a useful but secondary function. Primarily, they view such systems as a way for homeowners to limit their utility bills by practicing something called "peak shaving."
