## Can I build my own Solar System?

Build your own solar system with do it yourself solar panel kits. Save costs, power your home or RV, and explore our expert guide to DIY installation.

## How do I start a DIY solar system?

The first step in your DIY solar journey is designing a system that meets your energy needs and fits your rooftop. Here's what you need to consider: Sizing Your System: Calculate your home's energy consumption by reviewing your electricity bills. Determine the number of solar panels required to offset your usage.

## Should you install your own solar energy system?

In recent years, more and more homeowners have been opting to install their own solar energy systems rather than paying the high fees associated with traditional solar installation services. This trend is driven by a desire to save money and gain a deeper understanding of the technology powering their homes.

## How does DIY solar work?

At DIY Solar, we take care of the designing of your system (with your input, if you'd like), getting the engineering work done, guiding you through the permitting process, sourcing all the materials and packing it into a nice kit with instructions that you can install yourself.
