To mitigate SOC inconsistency during operation, this paper proposes a fuzzy control-based hierarchical active equalization strategy, specifically designed for lead-carbon battery energy ...

By introducing a hierarchical active balancing fuzzy control strategy within the BMS, the proposed approach effectively mitigates inconsistency issues in lead-carbon battery energy storage ...

ries and/or parallel configurations and housed in enclosures. BESS are widely used for various applications, such as grid support, renewable energy integration, backup power, peak shaving, ...

This paper studies the frequency regulation strategy of large-scale battery energy storage in the power grid system from the perspectives of battery energy storage, battery ...
