-----  
What's going on with battery storage in Germany?

At the 3rd BVES Investor Summit in Berlin, more than 500 industry leaders gathered to weigh the hype against the hard realities. The hype around the German battery storage market continues to build - but so do the challenges, particularly around grid connections.

How is energy supplied in Berlin?

Berlin's urban area is supplied with energy via approx. 900 km of high voltage cable, 10,900 km of medium voltage cable and 23,900 km of low voltage cable. We use this to ensure that every part of Berlin has a secure energy supply. However, not every district has cables at all voltage levels.

Is Germany's battery storage boom real?

Germany's battery storage boom is real but so are the bottlenecks. As capital pours in and gigawatt-hour-scale projects near launch, grid connection delays and regulatory uncertainty are threatening to dampen momentum. At the 3rd BVES Investor Summit in Berlin, more than 500 industry leaders gathered to weigh the hype against the hard realities.

Are battery storage projects operating under flexible grid connection agreements?

Faced with growing grid connection scarcity, some battery storage projects in Germany are now operating under flexible grid connection agreements.

In the project, the I&W conducts research and interviews to determine the obstacles and success factors for the use of heat storage systems. Based on these results and several workshops ...

This price threshold is much lower than the price threshold when energy storage subsidies were available. It can be concluded that in the current market environment, subsidies for energy ...
