Do you carry IP55 enclosures?

We carry IP55 enclosures that demonstrate almost complete protection from particles and a good level of protection against water. All of our enclosures rigidly adhere to the guidelines, so you can count on outstanding and cost-effective enclosures. Refer to the chart below for the IP55 standard protection specifications and ratings:

Are IP55 and IP65 rated enclosures suitable for external use?

A: Yes, both enclosures rated IP55 and IP65 are suitable for external use. These enclosures are protected against ingress of dust and water jets, making them suitable for a wide range of indoor and outdoor uses. However, harsher outdoor environments may be suited to IP65 rated enclosures as it offers higher protection.

Why are IP55 enclosures important?

IP55 enclosures are developed to provide optimal protection from various forms of water exposure. They are resistant to water jets at low levels of pressure aimed at them from any angle. Through effective engineering, water can never escape, otherwise it causes corrosion and electrical failure.

What are IP51 to IP55 ratings?

As explained, IP51 to IP55 ratings indicate different levels of protection against dust and water. Understanding these ratings helps in selecting equipment suitable for specific environments, ensuring durability and reliability in various conditions.
