Which data centers are in the Indonesia data center market?

Telkom Indonesia, NTT DATA, and Princeton Digital Group have established many data centers in the Indonesia data center market and have many facilities in line for setting up in the future.

Why is Jakarta a good destination for data center investments?

Jakarta holds more than 40% of existing power capacity and more than 50% of existing area. Tax incentives and lower energy costs make Indonesia a prime destination for data center investments. The data points covered in the database across each facility are mentioned below:

How much power does a data centre consume?

While the industrial sector remains the largest consumer of power, and rising temperatures have accelerated power demand for cooling requirements, data centres are rapidly increasing their share of power consumption: globally, they are forecast to consume over 1,000 terawatt hours by 2026.

How much will a reduction in PUE cost a data centre?

Per Cushman & Wakefield estimates, a 0.1 reduction in PUE would result in \$1.9 million in annual power cost savings. This cost variable has implications for location strategy and data centre networks, particularly as AI heralds increased workload deployment.

Get detailed info about Data center cost as per no. of racks and all other information like total load in MW, area required (sqft), IBMS load, required cooling load, UPS sizing & DG sizing. ...
