-----  
How efficient are container ports in South Asia and Middle East?

The number of studies available in the literature analyzing the efficiency of container ports in the South Asia and Middle East is very limited. Specifically, for Pakistani ports there have been no such study which could evaluate their technical efficiency.

What is the percentage of efficient ports in South and Middle East?

Being one of the main and busiest port of the country it has been provided with latest machinery,equipment and IT management systems. As compered to East Asian ports,the percentage of the efficient ports in South and Middle East is 13.33%as only two ports out of 15 are efficient,which is much lower.

Which container ports are the most efficient?

In comparison, looking at the efficiency results of the South Asian and Middle Eastern container ports, only two ports are efficient. The efficiency of the Jebel Ali is for the reason that it is one of the prominent ports of the region and serves as a main hub for the UAE's shipping business.

Why is port infrastructure important in the Middle East?

As Middle Eastern countries strive to diversify their economies and reduce reliance on oil, the efficiency of their port infrastructure becomes increasingly significant. Efficient port operations attract foreign investment, spur job creation, and enhance the competitiveness of local industries.

The initiative showcased a forward-thinking approach to maritime logistics, blending Portall"s global expertise with deep regional insights to create a tailored solution that addressed the ...

Integration with Existing Systems:Many ports in the Middle East operate with legacy systems that are not easily compatible with new automation technologies. The integration process can be ...
