How much does a curved solar roof cost?

Jackery announced new curved solar shingles at CES, blending in seamlessly with residential roofs. Jackery's XBC curved shingles promise near 25% cell conversion efficiency, exceeding traditional solar panels and other solar roofs. Modular design allows for easier installation on homes of varying sizes, with pricing ranging from \$7,000 to \$20,000.

Are curved roof solar shingle panels better than Tesla's?

Jackery had a lot to share at the annual Consumer Electronics Show (CES), including its new curved roof solar shingle panels, where elegance meets energy. These aren't your average solar panels, and they look better than Tesla's solar roof. It's the exact type of system I've been waiting for, and here's why.

Are Jackery roof solar panels curved?

Just look at the image above. That's a roof covered in Jackery's system. Not only are they curved (a first for US roof solar panels), but they even come in the popular terra-cotta red that most clay tile roofs have. Additionally, you can choose an obsidian black array.

What is Jackery's new solar roof tile system at CES 2025?

Jackery has launched a new solar roof tile at CES 2025 featuring a curved design. The solar roof tiles, integrate with existing roof tiles and architecture and boast a claimed cell conversion efficiency of over 25%. The rooftop tile system can generate a maximum of 170W per square meter, with each tile generating a nameplate capacity of 38 W.
