What is ebess battery container?

The power grid is facing a number of challenges in meeting the growing demand for renewable energy. Nordic Batteries is at the forefront of developing customized battery and energy storage solutions to meet these challenges. Our eBESS battery container is a high-performance energy storage solution designed for use in the power grid.

What does Nordic batteries do?

We develop battery modules, racks and energy storage systems designed to power industrial applications across challenging sectors, including construction, maritime, defence, and grid systems. At Nordic Batteries we focus on what is important: safety, reliability and performance.

Why should we invest in EV battery recycling in Norway?

Our BESS holds immense potential for contributing to Norway's burgeoning clean energy landscape. Upon installation at the EV battery recycling facility, Hydrovolt, it will play a pivotal role in optimizing energy utilization and unlocking new revenue streams.

Why should you choose ebess battery container?

It can be easily integrated into the power grid, providing a seamless and efficient energy storage solution. With advanced lithium-ion battery technology and intelligent control system, our eBESS battery container offers a scalable and modular energy storage solution that is easily expandable as energy demands increase.

Hybrid Inverter Solutions for Off-Grid Containerized Systems Our hybrid inverters bridge solar input, energy storage, and local grid or generator power in containerized environments. With ...
