What is power distribution in a server rack?

Power distribution within server racks ensures reliable power delivery to all mounted equipment. Power Distribution Units (PDUs) manage power distribution efficiently, ensuring all devices receive the power they need.

What is a rack power distribution unit?

A Power Distribution Unit (PDU) is an appliance made for transmitting electrical energy to numerous devices within the server rack. It acts as an important part in data centers, which guarantees continuous and reliable power supply from a rack mount PDU to servers and networking devices.

What is a power distribution rack (PDR)?

Power distribution racks (PDR) are typically seen in larger high-density data center environments. A power distribution rack provides space-saving power distribution in a flexible design. These racks can offer 168 circuits and accommodate more servers with multiple power cords and rack PDUs with growing loads.

Where can I find reliable power distribution units (PDUs)?

Discover reliable Power Distribution Units (PDUs) at Server Racks Online, designed to efficiently distribute power to your IT, network, and server equipment.

Power distribution units for server racks Eaton's rackmount PDU offering provides you with the power density and flexibility you require regardless of whether you're looking for PDUs for ...

Explore our comprehensive Rack PDU Selection Guide for server racks. Find the perfect power distribution unit from Eaton for your data center or network environment. Choose ...
