-----  
What are outdoor Telecom cabinets?

Our outdoor telecom cabinets are designed to protect your sensitive network equipment from harsh environments where equipment may be exposed to dust or water. For added protection, there is a water and dust proof polyurethane door joint strip.

What are the applications of outdoor electrical telecom enclosure?

Outdoor electrical telecom enclosure mostly suitable in various applications such as public work, traffic, security cabinets, control and instruments, telecommunication, electrical substation, windfarms and solar farms, and many more. Applications

What is a virtual power plant (VPP)?

While grid operators and public officials worked around the clock to manage the crisis, another kind of teamwork quietly sprang into action. Behind the scenes, thousands of smart devices -- such as thermostats, home batteries, and electric vehicles -- joined forces to form what's known as a virtual power plant, or VPP.

How do virtual power plants work?

As demonstrated during June's heatwave, virtual power plants rely on thousands of connected devices working together behind the scenes to keep the grid stable and reliable. Utility companies or individuals can make small adjustments to each device's energy use, whether it is a smart thermostat, a home battery, or an electric vehicle.
