---

The increasing adoption of electrochemical storage for grid stabilization, renewable firming, and industrial applications creates a sustained demand for specialized cooling systems.

Cool Thermal Energy Storage is a new application of an old idea that can cut air conditioning energy costs in half while preparing your building for the future. Air conditioning of commercial ...

Thermal energy storage is like a battery for a building's air-conditioning system. Thermal storage systems shift all or a portion of a building's cooling needs to off-peak, night time hours.

Thermal energy storage (TES) for cooling can be traced to ancient Greece and Rome where snow was transported from distant mountains to cool drinks and for bathing water for the wealthy. It ...
