How can European policymakers help the battery storage sector?

Recommendations How can European policymakers help the battery storage sector Battery storage systems are essential for strengthening the EU's energy security and competitiveness by enhancing flexibility, providing ancillary services to secure the grid, maximising the use of renewable energy, and effectively dealing with energy price volatility.

What is the battery storage Europe platform?

The Battery Storage Europe Platform brings together industry leaders representing the battery storage value chain to advance the business case and regulatory frameworks for battery storage across the EU. Together, we urge a tenfold increase in battery storage by 2030 to ensure Europe's energy transition, security, and competitiveness.

How much battery storage capacity will Europe have in 2023?

According to the latest analysis from SolarPower Europe, Europe added 17.2 GWh of new battery energy storage capacity in 2023, a 94% increase over the previous year, marking the third consecutive year of the market roughly doubling. This brought the total installed battery storage fleet to around 36 GWh by the end of the year.

What is the European market outlook for battery storage?

refers to the European Market Outlook for Battery Storage SolarPower Europe In last year's 'European Market Outlook for Battery Storage 2024-2028' (BESS 2024) report, our Medium Scenario anticipated 22.4 GWh of battery capacity deployed in 2024. The current revision of the actual installation data lands very close to this forecast.

Dozens of companies are now offering energy storage solutions. In this article, our energy storage expert has selected the most promising energy storage companies of 2024 and demonstrates ...
