-----  
What is an uninterruptible power supply (UPS)?

UPS, uninterrupted power supply by Legrand An uninterruptible power supply or uninterruptible power source (UPS) is an electrical apparatus that provides emergency power to a load when the input power source or mains power fails.

What is a ups & how does it work?

It is a type of continual power system. A UPS is typically used to protect hardware such as computers, data centers, telecommunication equipment or other electrical equipment where an unexpected power disruption could cause injuries, fatalities, serious business disruption or data loss.

Who are ups engineers?

Vast in-house tertiary and internationally qualified expertise in electrical engineering, with a team of over 30 employees who are more than 70% technically qualified and experienced, resulting in a solid engineering base in the UPS emergency backup power industry.

Who makes Riello ups?

We have been the sole distributor for Riello UPS - which is 100% designed and manufactured in Italy- since 2003, ensuring high-end UPS quality and reliability from the 5th largest UPS manufacturer in the world for all of South Africa except for in the Western Cape and KZN. What UPS and Emergency power service do we offer our clients?
