Do I need an exhaust fan for a generator?

Some indoor installations may require the use of one or more exhaust fans, to provide adequate ventilation during generator operation. Exhaust fans must have the proper capacity for the specific application. In addition, the fans must be located so that engine exhaust gases will not re-enter the building.

What is a containerised generator?

Our Containerised Generators deliver robust, high-capacity power from 300-3,000 kVA in secure, weather-resistant enclosures. Designed for challenging environments and critical applications, they offer noise reduction, easy transport, and bespoke configuration to meet your site's exact needs.

What are the different types of generator cooling systems?

Each generator set manufacturer offers different cooling system design options. The two most common types are closed-loop and open-loop systems. Closed-loop systems incorporate pumps, fans, and radiators located on a skid, creating an all-in-one unit, with container and trailer options also available.

What is container type diesel generator set?

Container type Diesel Generator Set Jet power supply container type generator set is design in accordance with ISO/TC104 standard size, rational construction, to make sure the generator set will not be damaged due to under high pressure in transport, and is suitable for ship transportation.

An external cooling system for MTU genset containers is a specialized assembly designed to dissipate the heat generated by the gas generator ...
