Can a solar battery power a generator?

Plus, a battery can keep your solar panels running when the grid is down - something a generator cannot do. You can maximize your home's resilience against power outages by installing both a solar battery and a standby generator. Much like with solar panels, a generator and battery cannot power your home at the same time.

Can a generator run a home with solar power?

Here's the deal - even if you have a standby generator hooked up to your home, your solar panels aren't going to turn on when the grid is down. Unfortunately, you cannot run your home with both solar power and generator power at the same time. In other words, the generator and the solar panels cannot operate parallel to one another.

What is a solar generator?

A solar generator is the combination of a portable battery bank with a solar panel. In a way, it's really two products: the portable battery bank, often called a "portable power station" that you can use to power and charge your devices, and one or more solar panels that you can use to charge the portable battery bank itself.

Which solar generator is right for You?

Whether you want something compact for camping or a larger unit for emergency home backup, these solar generators deliver the goods. The Jackery Solar Generator 2000 Plus is a fast-charging portable power station that can be bundled with SolarSaga 200W panels for recharging off-grid.
