Will German transmission system operators start paying battery energy storage resources?

In related regulatory news that would have big implications for energy storage, German transmission system operators (TSOs) will start to pay battery energy storage system (BESS) resources for inertia services starting next year.

Do grid operators charge fees for Bess connection?

While grid operators are allowed to charge these fees for BESS connection, the absence of a standardized national approach has led to significant regional disparities. In some areas, particularly in northern Germany, operators offer discounts of up to 80%, whereas in others, developers bear the full cost burden.

What changes have been made to Bess projects in Germany?

The German legal framework for BESS projects is currently also in a process of changes: The German parliament adopted a comprehensive energy reform package on 31 January 2025, which includes relevant changes for BESS projects with the aim to further support the growth of storage capacities in Germany.

Will Germany reach 12gw of Bess capacity by 2030?

Although most of this proposed capacity is unlikely to reach final investment decision, the outlook for actual installations remains ambitious. If the current BESS deployment rate of 1GW of additional capacity every six months continues, Germany could exceed 12GW of installed grid-scale BESS capacity by 2030.

This turnkey package is specifically tailored to meet the client's individual needs for either off-grid or on-grid applications. It offers a ready-to-deploy solution, making it an ideal choice for those ...

The solution, known as BESS (Battery Energy Storage System), has a total initial capacity of 2.7 MWh of energy storage and a power of 2 MW. It includes a Power Conversion System that ...
