Will Greece install 900 MW of storage by 2030?

According to the Greek National Energy and Climate Plan (NECP), the nation aims to install 4.3 GW of storage by 2030. Thus far, 900 MW has been allocated via the Greek Regulatory Authority for Energy, Waste, and Water (RAAEY) tenders. Therefore, the remaining share would be delivered under the new plan but without any subsidy support.

Does Greece have a zero-subsidy battery system?

The much-awaited ministerial decree for zero-subsidy standalone battery systems has been published in Greece. So far, Greece has provided support to 900 MW of standalone storage projects under three previous auctions.

How much power will Greece have by 2030?

The government now aims for 2.65 GW of battery projects on the transmission grid and a further 900 MW on the distribution grid. According to the Greek National Energy and Climate Plan (NECP), the nation aims to install 4.3 GW of storage by 2030.

What is PPC renewables doing in Greece?

o 467MW hydroelectric project with energy storage capacity of 9,646MW at northern Greece, Sfikias area, Imathia - managed and operated by PPC Renewables. o 156MW energy storage from hydroelectric plant of 150MW at western Macedonia, Mavropigi area, Kozani - managed and operated by PPC Renewables.

3 days ago · PPC begins hybrid solar and battery project on Astypalea to meet 80% of the island's energy needs and cut 5,700 tons of CO2 per year.

2 days ago · Greece offers strong renewable energy investment opportunities in solar, wind, and storage with EU support.
