How many power plants are in Cuba?

Cuba has 13 utility-scale power plants in operation, with a total capacity of 3496.8 MW. This data is a derivative set of data gathered by source mentioned below. Data and information about power plants in Cuba plotted on an interactive map.

How much energy does Cuba produce?

Oil and natural gas provide roughly 80% of Cuba's total energy supply, with biofuels and waste accounting for most of the remaining 20%. In 2020, 95.1% of electricity generated in Cuba came from non renewable resources and the remaining 4.9% from renewable sources (3% biomass, 0.8% solar, 0.6% hydro, and 0.5% wind).

What are the major energy companies in Cuba?

UNE (Unión Eléctrica) is responsible for the generation, transmission, distribution, and commercialization of electrical energy. CUPET (Unión Cuba-Petróleo) is the state-owned oil firm and Cuba's largest oil company. Other companies operating in Cuba's energy sector include Energas, Inter RAO, Zerus, Havana Energy, and Siemens.

What is Cuba's energy supply?

This page is part of Global Energy Monitor's Latin America Energy Portal. Oil and natural gas provide roughly 80% of Cuba's total energy supply, with biofuels and waste accounting for most of the remaining 20%.

Data and information about power plants in Cuba plotted on an interactive map.

Due to this, there are about 9 164 photovoltaic systems in Cuba that provide energy for schools and hospitals. However, the high cost of installing photovoltaic panels at the initial stage ...
