How much does a solar system cost per watt?

As of publishing, the average cost per watt is \$2.84. Most solar companies set the price according to the solar system's wattage. A solar installation's "cost per watt" is a little like the "price per square foot" when you buy a house. It helps compare the value of solar energy systems in different sizes.

How much does a 3 kW solar panel cost?

A 3 kW solar panel system costs \$9,150 in 2025 before incentives. A 3 kW solar panel system produces about 4,356 kWh of electricity annually, but the exact amount depends on where you live and how much sun you get. DIYing a 3 kW solar panel system usually isn't your best bet: You're much better off hiring a professional solar company.

How much does a 5 kilowatt solar system cost?

The average national cost for a 5-kilowatt system ranges from \$14,000 to \$20,900, depending on the source and period of data. EnergySage reports that the average cost of a 10.8 kW solar panel installation is around \$29,926 before federal tax credits, which reduces to \$20,948 after the credits are applied.

Can a 3 kilowatt solar system save you money?

If you've been considering solar, you're probably curious about costs --and maybe a little envious of neighbors who've already made the switch and are enjoying lower electric bills. A 3 kilowatt (kW) solar panel system can help power your home while significantly reducing monthly utility costs.

Nov 3, 2024···With rising energy bills and climate change concerns, many homeowners and businesses are considering installing solar panels. But what is the full cost of going solar? This ...
