How much does a 10MW solar power plant cost in India?

On average, the cost of a 10MW solar power plant in India ranges between Rs 49 to 50 crores. Several factors influence the initial solar investment. The key component making up a solar power plant is the solar panel which comes in various forms.

What is a 10 MW solar power plant?

Imagine a vast area, typically the size of about 40 football fields, lined meticulously with rows of gleaming solar panels--this is what encompasses a 10 MW solar power plant. Such a facility is capable of producing enough electricity to power approximately 2,000 average homes, making it a significant contributor to local energy needs.

Why should you buy a 10MW solar power plant?

As you settle the entire cost of the 10MW solar power plant with your solar energy company, you become the owner of your solar plant and all the energy it generates. As a solar power owner, you benefit from the supply of free-of-cost, clean electricity for the next 25+ years.

How to choose a solar panel for a 10 MW installation?

Solar panels are the most visible and crucial components of a solar power plant. For a 10 MW installation, the type and quality of the panels significantly influence the overall efficiency and output. Panels can be selected based on: Type: Monocrystalline panels are more efficient and perform better in limited space but are costlier.

Thinking of installing a 10 MW solar power plant? Synergy Solar, a leading installer, explains the cost, land needed, subsidy, ROI, and full setup process.
