Which state has the lowest PV installation rate in Australia?

Queensland. The other states and territories had lower percentages,with the Northern Territory having the lowest uptake of 0.4 per cent or 229 new i 1 April 2023Ten years ago,Australia's average rooftop PV system size was 3.4kW and it has steadily increased to approximately 8.3kW toda

How many solar PV installations are there in Australia?

As of 30 September 2025,there are over 4.22 millionPV installations in Australia,with a combined capacity of over 43.0 gigawatts. The following graphs show the rated capacity of solar PV installed in each month. The rate of installations has been influenced by changes in the policy mechanisms that have supported this technology.

Are solar farms a viable option for Australia's energy landscape?

While the initial investment and land-use issues present challenges,the long-term environmental and economic benefits are undeniable. As solar technology costs continue to decline,and with government support,solar farms will become an even more viableand essential component of Australia's energy landscape.

What is Australia's least cost electricity generation mix?

Consistent with previous report findings,the draft 2025-26 GenCost Report finds that solar PV and onshore windform the basis for the least cost electricity generation mix for Australia. Other key findings from the draft 2025-26 report include:
