How much does a solar roof tile system cost?

To give you an idea, the average 3.5 kW solar roof tile system will cost around $\$13,000$, compared to approximately $\$7,000$ for a regular PV system. However, remember that you are also getting a new roof with your solar tiles, so a direct price comparison is slightly misleading. Information last updated in April 2025.

What are solar tiles?

Solar tiles are roofing materials that can produce energy directly from sunlight. Solar tiles are integrated into the roof itself and function as both a roofing substance and a source of energy, as opposed to conventional solar panels, which are mounted on top of an existing roof.

Are solar panels better than roof tiles?

Solar panels, that is solar panels on slate roofs, are still the better investment overall compared to solar roof tiles. Roof tiles are expensive because you are ultimately installing a new roof, and while they look great, they can be less efficient than solar panels.

Why are roof tiles so expensive?

Roof tiles are expensive because you are ultimately installing a new roof, and while they look great, they can be less efficient than solar panels. As we've mentioned, solar tiles tend to range between 10% and 20%, although some models approach the best solar panels, topping at around 23%.
