Why should you invest in EV charging infrastructure in Vietnam?

Amid the booming electric vehicle (EV) movement in Vietnam, the demand for sustainable and safe EV charging infrastructure has become more urgent than ever. This presents both opportunities and challenges for investors and high-quality electrical equipment providers like BTB Electric.

Which switching devices are suitable for EV charging stations?

Switching Devices BTB Electric offers MCBs, MCCBs, RCBOs, and ACBs suitable for EV charging stations. MCBs protect small control circuits, auxiliary power lines, and lighting circuits from overloads and short circuits. MCCBs are critical for protecting costly power converters inside EV charging cabinets.

Will EVs replace internal combustion engine vehicles in Vietnam?

A World Bank report predicts that EVs could replace internal combustion engine vehicles by 2035. To meet the target of 1 million EVs by 2030, Vietnam would need at least 50,000 charging stations with 800,000 charging ports. By 2050, that number would rise to 6 million.

Bottom Line So, how much does a commercial electric vehicle charging station cost? With smart planning and incentives, it's more affordable than you think. Installing one now will be a ...
