How much does a wind turbine cost?

Dramatic Cost Range: Wind turbine costs span from \$700 for small residential units to over \$20 million for offshore turbines, with total project costs varying from \$10,000 to \$4,000+ per kW installed depending on scale and location.

How much does an offshore wind turbine cost?

Large offshore turbines can cost tens of millions of dollars, with the most powerful 12 MW turbines reaching up to \$400 million for manufacturing and installation. Lastly, Statista reports that the global average installed cost for onshore wind power was approximately \$1,160 per kilowatt in 2023.

How much does a distributed wind energy system cost?

The residential and commercial reference distributed wind system LCOE are estimated at \$240/MWh and \$174/MWh, respectively. Single-variable sensitivity analysis for the representative systems is presented in the 2019 Cost of Wind Energy Review (Stehly, Beiter, and Duffy 2020). Analysts included the LCOE estimate for a large distributed wind energy

What are the costs of a wind project?

Wind projects' costs include expenses other than turbines, like wind resource assessment and site analysis; construction; permitting and interconnection studies; utility system upgradation, transformers, protection and metering of the equipment; insurance; operations, warranty, maintenance, and repair; and legal and consultation fees.

These costs were calculated in 2025, they represent a snapshot of the industry at the time and have not been adjusted since to account for industry developments, commodity pricing or ...
