How much does a solar energy storage battery cost?

Solar batteries let you keep your lights on even when your local power grid is down. However, battery storage typically costs between \$7,000 and \$18,000. If you live in an area with frequent power outages, a solar energy storage battery is worth considering. Other equipment also factors into the overall price:

How much does a solar system cost?

If you just need a few panels for a small do-it-yourself solar project, expect to pay around \$200 to \$350 per panel (between \$0.80 and \$1.40 per watt). Note: The table below doesn't include the cost of a solar storage battery, which can add anywhere from \$7,000 to \$18,000 to your total solar system costs.

How much does a solar system save on energy costs?

On average, homeowners with a complete solar system save \$41,000 to \$62,000 on total avoided energy costs over 25 years. It all depends on what your local utility charges for electricity, according to Robert Flores, a solar expert at The University of California, Irvine's Clean Energy Institute.

How much does it cost to install a solar battery?

As of early 2025, the average cost to install a home solar battery in the U.S. ranges between \$9,000 and \$18,000 before incentives. After applying the 30% federal tax credit, most homeowners pay \$6,000 to \$12,000 for a complete setup. For a deeper dive into specific models and performance, explore our Best Solar Battery for Home guide.
