How much does a solar battery storage system cost?

Most solar battery storage systems cost \$10,000 on average, with most ranging between \$6,000 and \$12,000. Prices range from \$400 for small units to over \$20,000 for larger systems. Key cost factors include battery type, capacity, installation labor, and additional equipment.

How much does a solar battery cost?

The more energy your battery can store (measured in kWh), the higher the cost. You can expect to pay between \$400 and \$750 per kWh. Most solar battery systems are modular, meaning you can combine multiple batteries to generate more power. Your home's energy usage will determine how many or what size batteries are best for you.

How much does solar installation cost?

Installation costs vary based on unit size and brand. Smaller solar batteries can start at \$400. Keep in mind that you can also stack your solar batteries, creating a circuit that connects and makes one larger unit. This allows you to customize the size and energy output to meet your needs and budget.

Should you invest in a solar battery system?

Investing in a solar battery system provides backup power during outages and increases energy independence. Hiring a professional ensures proper installation and maximizes the system's efficiency. Get quotes from up to 3 pros! Enter a zip below and get matched to top-rated pros near you.
