-----

Resalta and Energetika Ljubljana are entering a public-private partnership with the City of Ljubljana for the installation of 5 MW in peak solar power capacity with an estimated ...

You know how Ljubljana's been making headlines with its solar panel installations? Well, here's the kicker - the city's renewable energy adoption rate has jumped 40% since 2021, but grid ...

Electricity generation is mainly provided by nuclear power (36.2% in 2019), hydroelectricity (29.1% in 2019), and coal (27.9% in 2019); the three sources accounting for 93.2% of total electricity generation. Minor sources of electricity generation, each contributing less than 4% of total electricity generation, are natural gas, solar photovoltaic (solar PV), and biofuels. Following steep declines in use since 1990, Slovenia eliminated the use of oil for generating electricity in 2019. Renewable energy
