Will Huawei fusion solar power Red Sea city's off-grid energy needs?

Huawei's FusionSolar Smart String Energy Storage Solution will power the Red Sea City's off-grid, clean energy needs. The Red Sea Project, a key part of Saudi Vision 2030, is now the world's largest microgrid with 1.3GWh storage capacity.

Why is Huawei involved in the Red Sea project?

Huawei's involvement in the Red Sea Project underscores its commitment to sustainability, technological expertise, and collaboration. "The Red Sea Project provides an unparalleled opportunity to demonstrate this commitment and showcase our industry-leading innovation and technology," said Xing. "It's a blueprint for sustainable cities.

What is Saudi Red Sea New City Energy Storage Project?

Huawei Digital Energy Technology and Shandong Electric Power Construction (SEPCO III) has successfully signed the Saudi Red Sea New City energy storage project. The energy storage capacity of the project reaches 1300MWh, which is by far the world's largest energy storage as well as off-grid energy storage project.

What is Huawei fusion solar smart string energy storage solution (ESS)?

Central to this vision is Huawei's FusionSolar Smart String Energy Storage Solution (ESS). This solution will enable the Red Sea Project to independently meet its power needs. The microgrid solution addresses the intermittent and fluctuating nature of solar and wind power. It ensures the safe and stable operation of renewable energy systems.

This will be the first large-scale commercial deployment of Huawei's Smart String Energy Storage solution, a technology launched in April 2021 that integrates digital information ...

At the summit, Huawei Digital Power signed a key contract with SEPCO III for the Red Sea Project with 400
