Who supports solar power in the Bahamas?

This goal is supported by the Inter-American Development Bank (IDB) and the Bahamas Development Bank (BDB). Currently, solar power makes up less than 1% of all energy generated in The Bahamas. Oil is responsible for nearly all power generation with a 99% share of electricity production.

Why should the Bahamas invest in solar energy?

Specifically, the government is taking advantage of the abundance and intensity of solar energy available to The Bahamas all year round by increasing the share of solar energy to 30 percent by 2030. Investing in solar also minimizes the adverse environmental impact and logistical challenges associated with other forms of energy.

Why is Bahama's energy crisis so dangerous?

An ambitious energy transformation For years, Bahamians have suffered from frequent power outages, while the reliance on imported fossil fuels--one of the highest in the Caribbean--for electricity generation leaves consumers and businesses vulnerable to high and volatile energy prices.

What are the macroeconomic benefits of modernizing electricity grids in the Bahamas?

Modernizing electricity grids and increasing the shares of solar energy and liquified natural gas (LNG) in electricity production can yield major macroeconomic benefits in The Bahamas.

Modernizing electricity grids and increasing the shares of solar energy and liquified natural gas (LNG) in electricity production can yield major macroeconomic benefits in The ...

The Government's National Energy Policy (NEP) is on track to expand its solar energy capacity to 30% of total energy production by 2033. This goal is supported by the Inter-American ...
