Does Liechtenstein have a good energy supply?

Liechtenstein currently has a secure energy supply, which is available at any time and affordable for the population and for companies. Electricity is the main energy source, accounting for roughly a third of total energy consumption, followed by natural gas (21.5 %) and diesel (11.9 %).

Is Liechtenstein a sustainable country?

Liechtenstein is the world's first "Energy Country"; Working with the private sector, the Energy and Climate Pioneers and Energy and Climate Workshop projects are teaching young people about sustainability and giving them the tools to play an active part in shaping a sustainable future.

What is the energy network in Liechtenstein?

The energy network in Liechtenstein came into being several years ago. At these events, companies invite guests to visit their plants and present their efficiency measures. This platform for exchanging experiences has proved valuable and will probably be continued.

Is Liechtenstein a solar power country?

With a cumulative installed photovoltaic capacity of 620 Watts per person, Liechtenstein is well ahead of Germany in first place in the world and has won the SolarSuperState Prize three times in a row. Liechtenstein is the first country in the world that can call itself an "energy country".
