What are Malaysia's New solar PV guidelines?

The Guidelines introduce key changes to the existing framework, enhancing the scope and flexibility of solar PV installations. These changes aim to accelerate energy transition in Peninsular Malaysia and support the country's goal of achieving a 70% renewable energy capacity mix by 2050.

How much are US import duties on Malaysian PV cells & modules?

According to data by the US Customs and Border Protection, import duties imposed by the US on Malaysian-made PV cells and modules are estimated at just US\$1.67 million in 2019, US\$2.18 million in 2020, US\$1.22 million in 2021 and US\$1.99 million in 2022. It had risen to US\$2.53 million this year as at May 23.

Does Malaysia have a PV industry?

Having said that, despite US tariffs being imposed on Malaysia from 2018 to 2022, the Malaysian PV industry, along with that of its three Asean peers, has managed to grow, owing to the strong demand for the product. Almost all of the PV products manufactured in Malaysia -- largely PV cells and modules (cells that have been assembled) -- are exported.

Will US tariffs reimposition affect Malaysia's solar industry?

On the flip side, the US tariffs succeeded in nudging some of the solar players in Malaysia to set up in the US. For instance, Jinko Solar has been operating a growing US plant since 2021, while JA Solar and Longi have expressed plans to manufacture in the US as well. Impact of reimposition of US tariffs next year on local scene
