Why do data centers use silicon carbide MOSFETs and diodes?

When datacenters are fitted with power supplies built with Wolfspeed's Silicon Carbide (SiC) MOSFETs and diodes, they can deliver more computing power per square foot-with a lower electric bill. A full 2% of all electrical energy in the U.S. is consumed by data centers, and that number is growing worldwide.

What materials are used to make distribution cabinets?

Our distribution cabinets can be made from materials such as Aluminum, Steel, or Stainless Steel. We provide a variety of outdoor power supply cabinets to meet the needs of different industries. We use only the highest quality materials and components to build our cabinets.
