What is energy storage container?

SCU uses standard battery modules, PCS modules, BMS, EMS, and other systems to form standard containers to build large-scale grid-side energy storage projects.

What is a battery energy storage system?

Battery Energy Storage Systems (BESS) enhance energy security for airports and transportation hubs by providing reliable backup power, reducing operational costs, and supporting sustainability initiatives. Learn how integrating BESS can improve resilience and efficiency in critical infrastructure.

What is a mobile energy storage system?

On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions. Maximum safety utilizing the safe type of LFP battery (LiFePO₄) combined with an intelligent 3-level battery management system (BMS);

How can battery energy storage systems help power your projects?

Get in touch with us today to explore how we can help power your projects. Battery Energy Storage Systems (BESS) enhance energy security for airports and transportation hubs by providing reliable backup power, reducing operational costs, and supporting sustainability initiatives.
