What is solar energy in Pakistan?

Solar energy is the heat and radiant light from the sun that can be harnessed with technologies such as solar power (used to generate electricity) and solar thermal energy (used for applications such as water heating). The Pakistani solar energy market is segmented by end users (residential, commercial, and utility).

How many solar projects are there in Pakistan?

According to the Private Power and Infrastructure Board of the Ministry of Energy, seven 530-megawatt solar projects are operational and supplying electricity to the national grid. Pakistan's renewable energy mix consists of solar, wind, hydroelectricity, and bioenergy.

When did solar PV enter Pakistan's energy mix?

Solar PV power entered Pakistan's energy mix in 2013 after the government introduced a set of support policies to foster renewable energy development. The Pakistani government knows that Pakistan has an average of 9.5 hours of sunlight daily.

Will Pakistan build a solar power plant in 2023?

Through the Alternative Energy Development Board, the government is attempting to construct solar power facilities nationwide to meet these objectives. According to the International Renewable Energy Agency (IRENA), Pakistan's total solar installed capacity was 1,244 megawatts as of 2023, an increase of 17% compared to 2021.

Full 2025 solar system prices in Pakistan! Compare costs for 1kW to 500kW systems (panels, inverters, batteries). Includes subsidies, ROI calculators, and trusted installers nationwide.
