Is Mongolia developing a solar power base?

In Inner Mongolia's Ordos, the city is not only developing solar power bases in traditional desert and arid regions but also advancing the construction of solar facilities in non-arable coal mining subsidence zones.

Is Inner Mongolia a microcosm of China's new energy sector?

Inner Mongolia can be seen as a microcosm of the rapid growth of China's new energy sector, which has maintained double-digit annual growth in recent years. Since 2013, the country's installed wind power capacity has grown sixfold, and its installed solar power capacity has surged more than 180-fold.

How many kilowatts of solar power is installed in Inner Mongolia?

HOHHOT -- Installed new energy capacity in the coal-rich Inner Mongolia autonomous region, including wind and solar, has surpassed 120 million kilowatts, exceeding the region's installed thermal power capacity for the first time.

How can Mongolia achieve CO₂ equivalent by deploying renewable energy by 2030?

CO₂ equivalent by deploying renewable energy by 2030. In Mongolia, key public institutions involved in renewable energy include the Ministry of Energy (MoE), ERC and the National Dispatching Center. The MoE develops and implements state policies, conducts feasibility studies, drafts standards, and collaborates on hu

Jan 27, 2024 -- Mongolia aims for 30% renewable energy by 2030, a major shift from its 90% coal reliance. Discover the challenges, investments, and solar successes driving this transition.

Oct 10, 2025 -- Inner Mongolia has started building a 16 GW ultra-high-voltage energy base combining solar, wind, coal, and 5 GWh of storage to supply 36 TWh per year to northern China.

Oct 9, 2025 -- This project marks the first 10-million-kilowatt-level "Desert-Gobi-Arid" wind and solar power base in Inner Mongolia to fully commence construction. With a total investment of ...
