Why does Morocco import electricity?

Because of that, Morocco relies on energy imports to satisfy the growing domestic demand. The country has traditionally been a net importer of electrical energy, although the net electricity imports have gradually declined. Morocco's energy sector is, nevertheless, in continuous expansion.

Does Morocco have a strong energy sector?

Morocco has a modest yet growing energy sector. The country's power generation remained relatively limited in recent years, especially compared to other North African producers such as Algeria and Egypt. Because of that, Morocco relies on energy imports to satisfy the growing domestic demand.

How much energy does the agricultural sector use in Morocco?

The agricultural sector in Morocco consumes around 3.9 TWh/year and emits over 3 Mt-CO₂e /year. The agricultural sector has made significant strides in integrating renewable energy to enhance sustainability, increase productivity, and reduce its carbon footprint.

What percentage of Morocco's energy is renewable?

Renewables will contribute 52 %, with solar and wind energy each providing 20 %, and hydropower accounting for 12 %. Looking toward 2050, Morocco's long-term renewable energy strategy targets 70 % renewables in its electricity production mix, with total generation expected to rise significantly to 214 TWh.
